EYOUTH

CAREER INTELLIGENCE REPORT

AI Engineer

Generated: 2026-11-03

01 | Executive Summary

فقط عند توافر تطابق كاف مع المهارات المطلوبة. تم تحديد 8 فجوة مهارية تحتاج إلى تطوير. تم تحليل سيرتك الذاتية ومقارنتها بالوظيفة المستهدفة. بإضافة مشروعات وأمثلة تثبت مستوى مهاراتك. راجع المهارات غير المغطاة وضع لها خطة تعلم وممارسة عملية. تم إدراج الكورسات المناسبة يمكنك تقوية ملفك

02 | Candidate Skills Profile

Skill	Claimed Level	Evidence
python	none	demonstrated
sql	none	demonstrated
pandas	none	demonstrated
power bi	none	demonstrated

03 | Skill Gap Analysis

Required Skill	Status	Candidate Level	Required Level
data analysis	missing		intermediate
machine learning	missing		intermediate
deep learning	missing		beginner
python	underdeveloped		advanced
sql	underdeveloped		beginner

Required Skill	Status	Candidate Level	Required Level
git	missing		beginner
large language models	missing		beginner
retrieval-augmented generation	missing		beginner

04 | Skills Requiring Verification

No unverified skills were recorded.

05 | Personalized Learning Roadmap

1. Coded Data Analysis

Delivery: recorded
Skills covered: python
Evidence: python: skill phrase found in course metadata

2. Machine Learning Diploma

Delivery: live
Skills covered: python
Evidence: python: skill phrase found in course metadata

3. Data Science Diploma

Delivery: live
Skills covered: python
Evidence: python: skill phrase found in course metadata

4. Full-Stack Data Analytics

Delivery: hybrid
Skills covered: sql
Evidence: sql: skill phrase found in course metadata

5. Miscellaneous AI Tools, Apps & Extentions

Delivery: recorded
Skills covered: large language models
Evidence: large language models: skill phrase found in course metadata

6. Vibe Coding: The Art of Ai-Assisted Flow

Delivery: recorded
Skills covered: large language models
Evidence: large language models: skill phrase found in course metadata

06 | Remaining Skill Gaps

• data analysis

- machine learning
- deep learning
- git
- retrieval-augmented generation

07 | Methodology & Limitations

- Role requirements are placeholders until sourced from real job descriptions.
- Course matching uses semantic similarity to rank candidates, not to prove course coverage.
- Course coverage requires a reviewed tag or an exact skill phrase in course metadata.
- An empty or unreviewed course tag file limits recommendation coverage.
- Absence from a CV does not prove absence of a skill; it means the skill was not evidenced.
- Unverified skills need demonstrated evidence before being considered demonstrated.
